

ZPC-9000

Quick Reference

Guide

Congratulations on the purchase of your ZPC-9000.
The world's most advanced PC built inside-a-keyboard.

OPEN IT UP

UNPACK THE BOX

1. Remove the components and computer from the box. Save the packing materials in case you need them later.
2. Remove the documentation package from the accessories box for important information.

If you did not purchase an operating system with your ZPC-9000 unit, then you must use the ZPC-9000 drivers CD supplied to install your own operating system.

CHECK THE COMPONENTS

Your computer comes with:

- Quick Reference Guide
- ZPC-9000 Drivers CD
- AC power cord and AC adapter
- Power cable 110/220V
- Additional software and/or accessories (as ordered)
- Limited warranty information.
- ZPC-9000 User Guide (on Drivers CD).

NOTE: The product specifications and configuration information listed are designed for a product series. Your particular model may not have all the features and specifications listed or illustrated here. For more detailed features and specifications on your particular model, please refer to your invoice or visit our website at www.cybernet.com. If any items are missing or damaged, notify your dealer or Cybernet Manufacturing Inc. immediately.

All product specifications, configurations, prices, system/component/options availability are all subject to change without notice.

PLUG IT IN

CONNECT THE POWER CABLE

1. Connect the AC power cable to the ZPC-9000 AC adapter unit.

2. Connect the AC adapter unit to the DC-IN on the back of the ZPC-9000 unit.

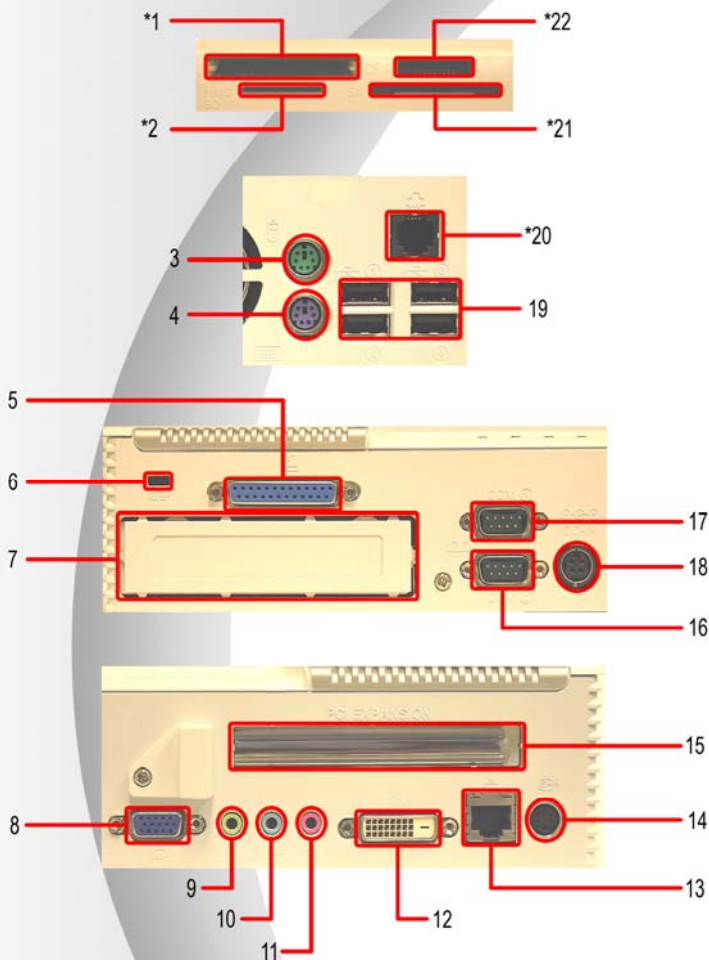

3. Connect your Monitor cable to the appropriate connector on the back of the ZPC-9000 unit.

4. Connect the other end of the AC power cable to a live electrical outlet.

AND SET IT UP

Press the power button to turn on your system

Before you call

Fill out the registration card. The information on this card will help the Technical Support Representative to address your concern more quickly. Keep the card in your records for future reference.

For faster service, write down all relevant information that pertains to the problem, such as error messages and software used (with version numbers). Make sure your system is plugged into a grounded power outlet. Place the system close to a phone so you can simultaneously talk with the technical support representative and use your computer.

Contacting Technical Support

Technical support is available from 8:00am to 5:00pm PST Monday through Friday by calling 888-834-4577
